- Vaccinations
- Pediatric & Adult Medicine
- X-ray

Who we are...

Founded in 1917, the Great Falls Clinic is the fourth oldest medical clinic west of the Mississippi. Originally based on the vision that quality healthcare need not be confined to large urban centers, our mission today is focused on becoming Montana's healthcare choice. To accomplish our goal, we strive to assess and meet the needs of the 250,000 residents living in the seventeen north central Montana counties that we serve.

As a leader in the Great Falls medical delivery system, the Great Falls Clinic works hard as a team of providers to institute positive change for our patients throughout Montana. Recruiting and retaining the most contemporary physicians and employees requires the latest in technology development. We must utilize these available technologies to meet the needs of an aging population and create more value for the patients we serve. The combination of physicians and employees working together to improve patient care is our commitment and can be defined as "Team Care." This means striving to constantly perform better services and to create more value for the people we serve.

Our responsibility as we continue to grow is to create more value for the patients we serve. One thing that will not change moving forward is that we will continue to have physicians and employees working together to bring the population of Montana the best healthcare possible. Our Great Falls Clinic team will continue to provide leadership in medicine through teamwork.
